

I am alarmed that you are considering making changes that would allow low powered FM stations to take priority over my listening station. It is very aggravating to have my station over road by another station when I am driving in my car. If I had wanted to listen to them, I would have dialed my radio to them. I realize this will affect several Christian broadcasting stations but I am referring to KLOVE in particular. My radios are tuned to this station in my hometown of Cabot and at my place of employment in Conway, as well as in all our vehicles. It has taken a long time for Christian broadcasting of this caliber to be heard so readily. If it were displaced by this LPFM broadcasting, it would affect an entire community of Believers. Not to mention that we pull our weight by paying for their airtime. I believe that the service provided by KLOVE is in the best interest of the public as it causes us to be better citizens of this world. Please do not let this happen. If anything, clean up the other air waves.

Thank you,
Nancy Beene
